In October 2014, Autodesk acquired a majority stake in US-based cloud services company Vectorworks. In February 2015, Autodesk revealed the development of a new operating system for AutoCAD and the release of AutoCAD LT, an open-source version of AutoCAD that is designed for smaller teams of users, starting in 2015. AutoCAD supports the following file formats: CAD Modeling Language (CADML) files (.cadml), Microsoft.dwg, SolidWorks DWG (DGN) format, AutoCAD format, and most other common CAD file formats. It also supports many generic file formats. Key Features of AutoCAD A user-friendly interface. Draws objects, including shapes, text, and dimensions, and annotates with lines, arrows, and text boxes. Allows for the efficient and convenient creation of components, such as curved surfaces and complex assemblies. Supports parametric modeling and is used for BIM development. Supports modeling of 2D and 3D drawings and can be used as a drawing tool. Supports the feature of sharing drawing objects. Allows for the creation of 3D drawings in a cloud environment. Simplifies the creation of orthographic views by providing a view angle setting. Requires an x86 CPU and can run on x64 or ARM CPUs. In December 2005, the software became the best-selling CAD program. History Autodesk, Inc. was founded in 1982 by the Jensen brothers, Frank and John, in San Rafael, California. Frank Jensen had already worked on SPSS statistical software in his former life as an accountant, but had always had a passion for computer graphics. Because SPSS software was used to create graphics to be shown on computer screens, the Jensen brothers decided to create a software that could create the graphics itself. For many years, they tested the product on their personal computers, only to realize that they weren't fully satisfied with the results. The brothers decided to make their product available to others as well. In the 1980s, the company was going through a difficult time and was losing money. They borrowed a large sum of money from Frank's mother and used the loan to acquire a company that made inkjet printers. During the first years, the company sold inkjet printers and made an effort to popularize the
