What's New in the?

1-2-3 Blood pressure Freeware is a handy and reliable application designed to help you monitor and control blood pressure over a period of time. It supports adding multiple different users, so you can keep track of the health indicators of every member in your family. Printing reports and generating charts are other advantages that this software offers. Note: The free version has some limitations (You can monitor the blood pressure of only one person, report analysis and colored view / assessment are not available). In order to remove them, hit the "Buy Now" button.
